SUMMARY OF QUALIFICATION

Operations builder who designs AI-driven workflow and quality systems from the ground up, from vendor QA frameworks to production automation pipelines. Deloitte consulting background brings structured rigor to ambiguous problems; startup experience at Clove built the muscle to launch, scale, and manage cross-functional operations end-to-end.

EDUCATION

Indiana University, School of Informatics and Computing, Bloomington, IN
Bachelor of Science in Informatics with Business Cognate

December 2021

PROFESSIONAL EXPERIENCES

Clove, Brand Inc. - Philadelphia, PA

Senior Operations Analyst

January 2025 - Present

- Independently prototyped and deployed two Shopify automation apps (Node.js/Railway): QuickDraft for bulk retailer order generation (150+ orders from one file upload, saving 3 hrs/day) and a Preorder Bulk Editor for SKU-level pre-order date management
- Built B2B Invoice Automation app integrating Shopify, Extensiv WMS, and QuickBooks Online, replacing a dedicated contractor (\$10,400-\$13,000/year), reducing invoice errors and accelerating book closing
- Architected end-to-end product launch automation pipeline using Claude, reimagining a fragmented, ad-hoc process into a scalable, repeatable playbook that auto-generates SKUs and GS1 UPCs, builds Shopify product pages with SEO content, and syncs new items to EDI vendor systems; reduced launch prep from days to hours
- Automated QVC dropship order processing with an hourly pipeline monitoring Rithum, generating labels, and notifying the warehouse via Slack; maintained 100% on-time fulfillment within QVC's 48-hour chargeback window
- Presented a Claude enablement session at Clove's all-hands (20 employees); automated the CX team's weekly open order audit using Claude in Chrome, categorizing orders into 5 actionable categories, and co-created a Claude SOP to standardize the workflow
- Driving Clove's Korea market entry in partnership with WG Company, a Korean distributor selling through Musinsa, W Concept, and BOONTHESHOP, providing sell-through data to guide an initial shipment of 1,000 pairs, navigating trademark resolution, and serving as direct liaison to WG Company's CEO on launch strategy

Operations Analyst

October 2023 - December 2024

- Owned 3PL vendor relationships and conducted monthly fulfillment and shipping cost audits, identifying billing discrepancies and overcharges; contributed to vendor evaluation process when exploring alternative fulfillment partners
- Designed and owned Clove's wholesale pricing operations from scratch, modeling shipping cost equations across 149 accounts to define tiered price breaks and launching a 7-tier Partnership Incentive Program (PIP), driving 264% growth in monthly order volume
- Led cross-functional execution for major trade shows (URA, ANCC) and brand launches, managing manufacturer negotiations, quality control, and delivery logistics; resolved shipping delay escalations by coordinating contingency plans with Marketing and Creative (GWP swaps, pre-orders) to protect launch dates
- Recruited, trained, and directly managed a cross-functional wholesale team (CX, Finance, Operations) as order channels expanded across EDI (SPS Commerce), The Uniform Solution, QVC, and Amazon, building the team's processes and using AI to optimize workflows

Primestone Consulting - Seoul, South Korea

July 2023 - September 2023

Business Operations Intern

- Identified the absence of operational structure at an early-stage consulting practice and independently built the team's first workflow guide, standardizing documentation and processes that became the team's lasting standard
- Independently managed 15+ client relationships within a boutique consulting practice, delivering end-to-end advisory support

Deloitte Consulting LLP - Chicago, IL

January 2022 - December 2022

Applied AI Analyst - Strategy & Analytics

- Data Analyst (Data Mapping Team) - Fortune 500 financial institution
 - Identified mapping logic for system of record (SOR) by addressing regulatory requirements, analyzed data from Hadoop using SQL, and provided recommendation for SOR
 - Managed offshore team, completing daily handoffs, delegating duties for the day, and solving and understanding issues
- Conversational AI Strategy Analyst - Fortune 500 health insurance company
 - Led AI adoption roadmap for a Fortune 500 health insurer at a consultancy specialized in process transformation, driving organizational change management across Personal Risk Services and Claims, aligning enterprise conversational AI capabilities to reimagine client experience at scale
 - Assessed organizational readiness and enablement gaps across use case selection, deployment phases, and change management drivers to sharpen AI adoption strategy and stakeholder alignment
